Scalability　　High Availability　　Security

Your Global Local ICT Solutions Partner

World-class Private Network Solutions for Fast-paced Global Enterprises

Communications lies at the heart of organizations. In today's aggressively competitive landscape, enterprise responsiveness and flexibility are crucial to success. CITIC Telecom CPC TrueCONNECT™ is a powerful connectivity solutions that empower any modern enterprise to deploy and manage world-class networks with maximum convenience, speed, security, versatility and cost-effectiveness. Comprising a range of innovative offerings to address varying needs, situations and scales, the TrueCONNECT™ family is the intelligent answer for site-to-site and point-to-point WAN connectivity, backed by the superior infrastructure and expertise of CITIC Telecom CPC.

Key Features

World-class Network Performance with High Security

TrueCONNECT™ private network solutions harness key advantages of performance, scalability, security, and interoperability to translate into real-world business benefits that maximize feature-richness and reliability. Moreover, TrueCONNECT™ operates over CITIC Telecom CPC's world-class infrastructure and is diligently managed 24x7 by the company's network professionals.

Maximum Network Traffic Quality and Control

TrueCONNECT™ solutions address enterprise needs for scalability and security without compromising on control and performance. Highly granular Class-of-Service and Quality-of-Service ensure companies a smooth transmission of time-critical traffic, such as voice and video, over possible burst of non-critical data traffic.

Powerful Connectivity with Easy Deployment and Administration

The TrueCONNECT™ series of enterprise connectivity solutions brings powerful networking to even the largest organizations, without the considerable complexities, cost, and ongoing overhead. All of the TrueCONNECT™ solutions are chiefly managed and deployed by CITIC Telecom CPC, freeing up companies and IT teams to focus on their core business areas.

Rapid and Convenient Scalability for all Sites and Teams

TrueCONNECT™ is truly flexible, enabling not only companies to quickly expand with branch presences, but also any remote user to easily establish seamless connections with corporate resources. The TrueCONNECT™ family also includes powerful network management and traffic acceleration solutions for added advantages.

Productivity Improvements Across the Entire Enterprise

The TrueCONNECT™ suite enhances productivity at every level of the organization. The workforce can enjoy powerful tools and communications options such as on-demand remote connectivity from the field, and WAN optimization that improves user experience so that workflow is smoother, more secure, and more reliable.

Superior Competitive Edge

Even more important than the features of your networking solution is the company behind the solution. CITIC Telecom CPC takes your mission critical business data and applications very seriously and has ensured key advantages to give you a superior competitive edge.

> **Fully Meshed Network with High Scalability & Availability**
> World-class CITIC Telecom CPC premises and the self-managed network has been specifically designed, and consistently refined, to be optimal for the company's innovative offerings, including the TrueCONNECT™ family.

> **Extensive Points of Presence**
> Extensive POP coverage across Asia Pacific and the world, including peering arrangements with top-tier global carriers to ensure worldwide coverage.

> **Class-of-Service (CoS) and Quality-of-Service (QoS)**
> CoS and QoS features allow companies to prioritize traffic, maximizing data security and traffic responsiveness.

> **Easy-to-use Service Management Portal**
> Gain visibility and the ability to manage network status and provision services via a user-friendly Web-based interface.

> **Support both IPv4 and IPv6**
> Seamless support for both IP protocols ensures smooth operations, flexible interoperability, and clear path to scalability now and in the future.

> **24 × 7 Network Monitoring**
> Highly professional networking and security staff keeps watch over CITIC Telecom CPC's infrastructure round-the-clock, providing proactive fault resolution and rapid response to customer requests and issues.

Flexible Options

CITIC Telecom CPC offers a variety of optional features for companies to create the ideal solution to perfectly match their unique requirements.

☑ Active / Active Load-Sharing

Dual independent local loops can be deployed for redundancy. In normal operation, they are used for load balancing and ensuring higher bandwidth.

☑ Active / Standby Backup

Standby Local Loop Backup uses a secondary local loop for contingencies. The Express Backup option uses TrueCONNECT™ Express as the failsafe measure.

☑ IPv6 Ready

Hybrid-stack IPv4 and IPv6 can concurrently operate on the same IP private network. Customers can choose to run either, or both, protocols in parallel, at each site.

☑ IDC & Cloud Connection

CITIC Telecom CPC's IDC subscribers save on local loop costs for connecting equipment to the TrueCONNECT™ network.

☑ BGP Routing

BGP can be used for dynamic routing updates of private IP addresses.

☑ IP Multicast

Single-stream traffic to multiple recipients can be utilized for a wide range of applications, including monitoring, multimedia conferencing, and push media.
